## Part I     Introduction

1	<b>Introduction</b> . . . . .	3
	E. MATZNER	
1.1	General Introduction . . . . .	3
1.2	Goals and Approaches of BITÖK Research . . . . .	4
1.3	Scope of the Synthesis and Problems Addressed . . . . .	5
References	. . . . .	10

2	<b>The Lehstenbach and Steinkreuz Catchments in NE Bavaria, Germany</b> . . . . .	15
	P. GERSTBERGER, T. FOKEN, and K. KALBITZ	

2.1	The Lehstenbach Catchment in the Fichtelgebirge Mountains . . . . .	15
2.2	The Steinkreuz Catchment in the Steigerwald Hillsides . . . . .	30
References	. . . . .	40

## Part II   The Changing Environment

3	<b>Trace Gases and Particles in the Atmospheric Boundary Layer at the Waldstein Site: Present State and Historic Trends</b> . . . . .	45
	O. KLEMM	

3.1	Introduction . . . . .	45
3.2	Sites . . . . .	46
3.3	Trends in Sulfur Dioxide . . . . .	46
3.4	Trends in Nitrogen Gases . . . . .	48

VIII		Contents
3.5	Trends in Ozone . . . . .	50
3.6	Trends in Fog Chemistry . . . . .	53
3.7	Aerosol Particles . . . . .	54
3.8	Conclusions . . . . .	56
	References . . . . .	57
<b>4</b>	<b>Climate Change in the Lehstenbach Region . . . . .</b>	<b>59</b>
	T. FOKEN	
4.1	Introduction . . . . .	59
4.2	Change of Climatological Elements . . . . .	59
4.3	Consequences of Climate Change . . . . .	65
4.4	Conclusions . . . . .	65
	References . . . . .	66
 <b>Part III Vegetation Response</b>		
<b>5</b>	<b>Atmospheric and Structural Controls on Carbon and Water Relations in Mixed-Forest Stands of Beech and Oak . . . . .</b>	<b>69</b>
	B. KÖSTNER, M. SCHMIDT, E. FALGE, S. FLECK, and J.D. TENHUNEN	
5.1	Introduction . . . . .	69
5.2	The Study Sites Steinkreuz and Großebene . . . . .	71
5.3	Analysis of Canopy Transpiration and Conductance by Means of Sap Flow Measurements . . . . .	76
5.4	Analysis of Carbon and Water Relations by Structural Variation in Model Systems . . . . .	87
5.5	Conclusions . . . . .	90
	References . . . . .	93
<b>6</b>	<b>Impacts of Canopy Internal Gradients on Carbon and Water Exchange of Beech and Oak Trees . . . . .</b>	<b>99</b>
	S. FLECK, M. SCHMIDT, B. KÖSTNER, W. FALTIN, and J.D. TENHUNEN	
6.1	Introduction . . . . .	99
6.2	Crown Structures of Mature Beech and Oak Trees . . . . .	104
6.3	Leaf Properties . . . . .	109
6.4	A Modelling Study on the Gas-Exchange of Leaf Clouds . . . . .	115

<b>Contents</b>	<b>IX</b>
6.5      Discussion . . . . .	121
6.6      Conclusions . . . . .	124
References . . . . .	124
<b>7           Soil CO<sub>2</sub> Fluxes in Spruce Forests – Temporal and Spatial Variation, and Environmental Controls . . . . .</b>	<b>127</b>
J.-A. SUBKE, N. BUCHMANN, and J.D. TENHUNEN	
7.1      Introduction . . . . .	127
7.2      Measuring Sites . . . . .	128
7.3      Temporal Variation of Soil CO <sub>2</sub> Efflux . . . . .	129
7.4      Within- and Between-Stand Variation of Soil CO <sub>2</sub> Efflux . . . . .	135
7.5      The Annual C Budget of the Forest Soil . . . . .	138
7.6      Conclusions . . . . .	139
References . . . . .	140
<b>8           Carbon Budget of a Spruce Forest Ecosystem . . . . .</b>	<b>143</b>
C. REBMANN, P. ANTHONI, E. FALGE, M. GÖCKEDE, A. MANGOLD, J.-A. SUBKE, C. THOMAS, B. WICHURA, E.-D. SCHULZE, J. TENHUNEN, and T. FOKEN	
8.1      Introduction . . . . .	143
8.2      Measuring Site and Quality Control . . . . .	144
8.3      Calculation of Fluxes . . . . .	146
8.4      Results and Discussion . . . . .	150
8.5      Conclusions . . . . .	156
References . . . . .	157
<b>9           Structure of Carbon Dioxide Exchange Processes Above a Spruce Forest . . . . .</b>	<b>161</b>
B. WICHURA, J. RUPPERT, A.C. DELANY, N. BUCHMANN, and T. FOKEN	
9.1      Introduction and <sup>13</sup> C Signatures . . . . .	161
9.2      Balances of <sup>13</sup> C and CO <sub>2</sub> . . . . .	163
9.3      Hyperbolic Relaxed Eddy Accumulation (HREA) as a Relevant Measuring Method . . . . .	164
9.4      Results . . . . .	168
9.5      Conclusions . . . . .	173
References . . . . .	174

<b>10</b>	<b>Modeling the Vegetation Atmospheric Exchange with a Transient Model . . . . .</b>	177
	M. BERGER, R. DLUGI, and T. FOKEN	
10.1	Introduction . . . . .	177
10.2	Short Description of FLAME . . . . .	178
10.3	Model Initialization for the Case Study . . . . .	179
10.4	Comparison of Measured and Modeled Fluxes . . . . .	183
10.5	Conclusions . . . . .	187
	References . . . . .	189
<b>11</b>	<b>Fog Deposition and its Role in Biogeochemical Cycles of Nutrients and Pollutants . . . . .</b>	191
	T. WRZESINSKY, C. SCHEER, and O. KLEMM	
11.1	Introduction . . . . .	191
11.2	Site . . . . .	192
11.3	Fog Chemistry . . . . .	193
11.4	Direct Measurement of Fog Deposition . . . . .	194
11.5	Fog Deposition Model . . . . .	195
11.6	Discussion . . . . .	199
11.7	Conclusions . . . . .	200
	References . . . . .	201
<b>12</b>	<b>Turbulent Deposition of Ozone to a Mountainous Forest Ecosystem . . . . .</b>	203
	O. KLEMM, A. MANGOLD, and A. HELD	
12.1	Introduction . . . . .	203
12.2	Site . . . . .	204
12.3	Experimental Setup . . . . .	204
12.4	Big Leaf Model . . . . .	205
12.5	Modelled Fluxes . . . . .	206
12.6	Deposition to the Forest Canopy . . . . .	208
12.7	Deposition to the Forest Ground . . . . .	209
12.8	Synthesis and Conclusions . . . . .	211
	References . . . . .	213

<b>13</b>	<b>The Emissions of Biogenic Volatile Organic Compounds (BVOC) and Their Relevance to Atmospheric Particle Dynamics . . . . .</b>	<b>215</b>
	R. STEINBRECHER, B. RAPPENGLÜCK, A. HANSEL, M. GRAUS, O. KLEMM, A. HELD, A. WIEDENSOHLER, and A. NOWAK	
13.1	Introduction . . . . .	215
13.2	Flux Measurement Methods . . . . .	218
13.3	Fluxes of Primary and Secondary BVOC . . . . .	220
13.4	Modelled Versus Measured Isoprenoid Emission . . . . .	223
13.5	Particle Size Distribution and Fluxes . . . . .	225
13.6	Conclusions . . . . .	227
	References . . . . .	228
<b>14</b>	<b>Trends in Deposition and Canopy Leaching of Mineral Elements as Indicated by Bulk Deposition and Throughfall Measurements . . . . .</b>	<b>233</b>
	E. MATZNER, T. ZUBER, C. ALEWELL, G. LISCHEID, and K. MORITZ	
14.1	Introduction . . . . .	233
14.2	Trends of Concentrations . . . . .	235
14.3	Trends of Fluxes and Total Deposition . . . . .	238
14.4	Rates and Trends of Canopy Leaching . . . . .	245
14.5	Conclusions . . . . .	247
	References . . . . .	248
<b>15</b>	<b>Phyllosphere Ecology in a Changing Environment: The Role of Insects in Forest Ecosystems . . . . .</b>	<b>251</b>
	B. STADLER and B. MICHALZIK	
15.1	Introduction . . . . .	251
15.2	Ecology of Canopy Insects . . . . .	253
15.3	Interactions Between Insects and Micro-organisms . . . . .	257
15.4	Biotic Interactions and Throughfall Chemistry . . . . .	258
15.5	Beyond the Canopy: Influences on Soil Processes and Ecosystems . . . . .	260
15.6	Synthesis and Future Prospects . . . . .	263
15.7	Conclusions . . . . .	265
	References . . . . .	267

<b>16</b>	<b>Element Fluxes with Litterfall in Mature Stands of Norway Spruce and European Beech in Bavaria, South Germany . . . . .</b>	<b>271</b>
	B. BERG and P. GERSTBERGER	
16.1	Introduction . . . . .	271
16.2	Discussion . . . . .	272
16.3	Concluding Remarks . . . . .	277
	References . . . . .	277
<b>17</b>	<b>The Role of Woody Roots in Water Uptake of Mature Spruce, Beech, and Oak Trees . . . . .</b>	<b>279</b>
	J. LINDENMAIR, E. MATZNER, and R. ZIMMERMANN	
17.1	Introduction . . . . .	279
17.2	Root Chamber Method . . . . .	280
17.3	Water Uptake Rates of Coarse Roots for Different Tree Species . . . . .	282
17.4	Time Course of Water Uptake for Spruce Roots in Relation to Climatic and Soil Physical Parameters and Xylem Sapflow Rates . . . . .	284
17.5	Extrapolation from Root to Tree Scale . . . . .	286
17.6	Conclusions . . . . .	286
	References . . . . .	287
<b>18</b>	<b>Radial Growth of Norway Spruce [<i>Picea abies</i> (L.) Karst.] at the Coulissenbieb Site in Relation to Environmental Conditions and Comparison with Sites in the Fichtelgebirge and Erzgebirge . . . . .</b>	<b>291</b>
	C. DITTMAR and W. ELLING	
18.1	Introduction . . . . .	291
18.2	Status and Radial Growth of Norway Spruce at the Coulissenbieb Site . . . . .	294
18.3	Growth Influences and Their Temporal and Regional Variations . . . . .	297
18.4	Conclusions . . . . .	307
	References . . . . .	308

**Part IV Soil Response**

<b>19</b>	<b>Environmental Controls on Concentrations and Fluxes of Dissolved Organic Matter in the Forest Floor and in Soil Solution . . . . .</b>	315
	K. KALBITZ, T. ZUBER, J.-H. PARK, and E. MATZNER	
19.1	Introduction . . . . .	315
19.2	Experimental Design and Sampling . . . . .	317
19.3	Analysis, Calculations and Statistics . . . . .	318
19.4	Long-term DOC and DON Concentrations and Fluxes at a Coniferous and a Deciduous Site . . . . .	319
19.5	Environmental Controls on DOM Dynamics . . . . .	326
19.6	Summary and Conclusions . . . . .	333
	References . . . . .	334
<b>20</b>	<b>Response of Soil Solution Chemistry and Solute Fluxes to Changing Deposition Rates . . . . .</b>	339
	E. MATZNER, T. ZUBER, and G. LISCHIED	
20.1	Introduction . . . . .	339
20.2	Development of Soil Solution Chemistry . . . . .	340
20.3	Development of Element Fluxes with Soil Solution . . . . .	345
20.4	Element Budgets of the Soil . . . . .	348
20.5	General Discussion . . . . .	354
20.6	Conclusions . . . . .	357
	References . . . . .	358
<b>21</b>	<b>Sequestration Rates for C and N in Soil Organic Matter at Four N-Polluted Temperate Forest Stands . . . . .</b>	361
	B. BERG	
21.1	Introduction . . . . .	361
21.2	Sequestration of Carbon in SOM Under Growing Stands of Norway Spruce and European Beech – A Model Validation . . . . .	364
21.3	Sequestration Rates of Carbon in SOM at the Sites Coulissenrieb and Steinkreuz . . . . .	368
21.4	Sequestration of Nitrogen in SOM Under Growing Stands of Norway Spruce and European Beech at the Site Solling – A Model Validation . . . . .	369

21.5	How Much Can the Model Explain the N Sequestration? – A Validation . . . . .	371
21.6	Sequestration Rates of Nitrogen in SOM in a Norway Spruce Forest at the Sites Coulissenrieb and Steinkreuz . . . . .	372
21.7	The Missing C and N Fractions – Can They Be Explained? .	372
21.8	How Stable Are the Long-Term Stored C and N Fractions in SOM? . . . . .	373
21.9	Concluding Remarks . . . . .	374
	References . . . . .	375
22	<b>Riparian Zones in a Forested Catchment: Hot Spots for Microbial Reductive Processes . . . . .</b>	377
	K. KÜSEL and C. ALEWELL	
22.1	Introduction . . . . .	377
22.2	Site Description of Wetland Sites . . . . .	378
22.3	Sequential Microbial Reductive Processes in Soils: Theoretical Considerations and the Reality in the Lehstenbach Catchment . . . . .	380
22.4	Wetlands of the Lehstenbach Catchment as a Sink for Anthropogenic Nitrate . . . . .	383
22.5	Wetlands of the Lehstenbach Catchment as a Sink for Anthropogenic Sulfate . . . . .	384
22.6	Ecophysiology and Phylogenetic Diversity of Sulfate-Reducing Prokaryotes in Fens of the Lehstenbach Catchment . . . . .	387
22.7	Competing Anaerobic Microbial Processes in Fens of the Lehstenbach Catchment . . . . .	388
22.8	Conclusions . . . . .	390
	References . . . . .	391

## Part V Catchment Response

23	<b>Dynamics of Runoff and Runoff Chemistry at the Lehstenbach and Steinkreuz Catchment . . . . .</b>	399
	G. LISCHEID, H. LANGE, K. MORITZ, and H. BÜTTCHER	
23.1	Introduction . . . . .	399
23.2	Statistical Analysis . . . . .	401
23.3	Discharge . . . . .	405

<b>Contents</b>	<b>XV</b>
23.4 Solute Concentration . . . . .	412
23.5 Conclusions . . . . .	432
References . . . . .	433
<b>24 Trends in the Input–Output Relations: The Catchment Budgets . . . . .</b>	<b>437</b>
G. LISCHEID, C. ALEWELL, K. MORITZ, and J. BITTERSOHL	
24.1 Introduction . . . . .	437
24.2 Determination of Catchment Budgets . . . . .	438
24.3 Output Fluxes Via Runoff . . . . .	441
24.4 Mean Budgets . . . . .	444
24.5 Changing Catchment Behaviour . . . . .	447
24.6 Conclusions: Long-Term Implications . . . . .	451
References . . . . .	452
<b>Part VI Synthesis</b>	
<b>25 Biogeochemistry of Two Forested Catchments in a Changing Environment: A Synthesis . . . . .</b>	<b>457</b>
E. MATZNER, B. KÖSTNER, and G. LISCHEID	
25.1 The Changing Environment . . . . .	457
25.2 Recovery from Acidification of Soils and Waters . . . . .	459
25.3 Fate of Deposited Nitrogen . . . . .	464
25.4 Carbon Sequestration . . . . .	469
25.5 Water Fluxes Between Vegetation and Environment . . . . .	471
25.6 Atmospheric Controls on Processes and Fluxes . . . . .	476
25.7 Criteria of Sustainable Use . . . . .	479
25.8 Overall Conclusions . . . . .	481
25.9 Outlook . . . . .	483
References . . . . .	484
<b>Subject Index . . . . .</b>	<b>491</b>
