

# Bodenkundliches Seminar, WS 19/20

Dienstags 16:15 Uhr in der Dr.-Hans-Frisch-Str., Raum H7

---

DATUM	Vortragender, Titel
03.12.19	Wolfgang Zech. Human impact on fire history and destruction of the Erica vegetation on the Sanetti Plateau (Ethiopia), as assessed by biogeochemical proxies of 1. Anthrosols and 2. depression sediments.
10.12.19	Sascha Scherer: Decipherment of Bronze Age land use practices in SW-Germany (Hegau)
17.12.19	Martin Obst: Identifying redox processes at the micro-scale
Weihnachten 🎅	
14.01.20	Michael Hauhs: Modelling transport processes at the catchment scale
21.01.20	Mutez Ahmed et al. (Soil Physics). Effect of soil drying on root-soil interactions and transpiration.
28.01.20	Johanna Pausch et al. (Agroecology) Root traits and C turnover in the rhizosphere
04.02.20	Meike Widdig (Soil Ecology): Soil element cycling affected by N and P additions
11.02.20	Nele Meyer (Soil Ecology): Long-term stabilization of labile carbon in soil microbial biomass and its residues – A question of microbial nitrogen demand?
18.02.20	Pascal Benard et al. (Soil Physics). Micro-hydrological niches in soils: how mucilage and EPS alter the biophysical properties of the rhizosphere and other biological hot spots
Karneval 🎉	
03.03.20	Tillmann Lüders:
