Bayceer

Exercise course:

Project Management & Scientific Coordination

Life is full of projects!

This holds for academia as well as the "working world". In the course, we discuss the different nature of projects and take care for one of them during the winter semester (teamwork). You can **choose projects** from my list of suggestions – or bring your own idea!

At the end, we look at **what** you have accomplished — and, even more important, **how** you did it.

Formalities

The course counts 2-3 ECTS depending on the amount of work for the seminar and your project.

Who can join?

- Students in Master Global Change Ecology (M11)
- Master and PhD students in the field of ecology and environmental sciences at the University of Bayreuth

The course requires a minimum of 6 participants.

Lecturer:

Birgit Thies, BayCEER Office, University of Bayreuth

Questions? Interested in joining?

Email <u>birgit.thies@uni-bayreuth.de</u> until 12th October!

Date for first meeting will found within group of interested students.
