Sommersemester / Summer Term 2014

BayCEER Kolloquium

Vortragsreihe Ökologie und Umweltforschung

Lecture series in Ecology and Environmental Research

Donnerstag 10. 7. 2014, 12:00 Uhr, H6

Anschließend Postkolloquium mit Mittagsimbiss im Foyer H6

Dr. Trung Thanh Nguyen
Ecological Services, BayCEER, UBT

Gains and Losses in Ecosystem Services: Tradeoff Perspective versus Efficiency Perspective

Die Vortragsreihe
ist eine
interdisziplinäre
Plattform zur
Information und
Diskussion für
Studierende,
Forschende und
Lehrende

Gäste
sind herzlich
willkommen

The lecture series
serves as an
inter-disciplinary
platform for
students, junior
and senior
scientists.

Guests
are cordially
invited!

Work at the interface of ecology and economics has inspired a major transformation in the way people think about the environment. Increasingly, ecosystems are seen as capital assets, with the potential to generate ecosystem services (ES). This gives rise of a new paradigm in environmental economics which perceives the environment as a source of services that improve human wellbeing. However, ecosystems provide not only a single ES but a bundle of different ES which are not independent of each other, and the relationship between them may be highly nonlinear. This requires a careful consideration when making land use decisions since tradeoffs and synergies between and among ES may exist. This talk is supposed to differentiate between (traditionally) ecological approach of ES tradeoff analyses with (newly) economic efficiency approach. It also summarizes various research efforts with these approaches in Germany, South Korea, and Vietnam to provide useful policy and management implications.
