

INVITATION

Launch of photo exhibition:

SPACED: USING EARTH OBSERVATIONS TO PROTECT NATURAL LANDSCAPES

Sunday, June 30th, 2019, 14:00

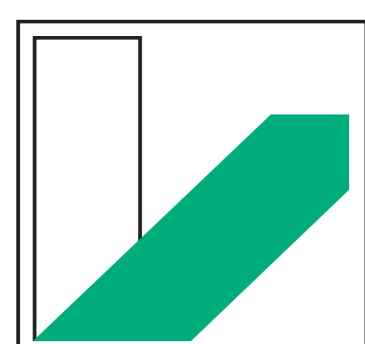

University of Bayreuth, Ecological - Botanical Garden, Mediterranean Greenhouse
Universitätsstraße 30, 95440 Bayreuth

Opening hours: Monday to Friday, 10 - 15:00

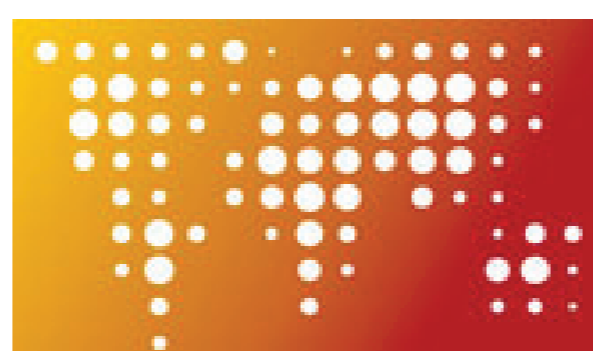

Sundays and public holidays, 10 - 16:00

Europe's latest generation of satellites are opening up a frontier of possibilities to observe the natural environment from above. Through stunning photos, satellite imagery and stories, 'SPACED' invites you to explore how protected area managers and scientists are working together to protect some of Europe's most iconic mountain, desert and coastal and marine protected areas. 'SPACED' is an initiative of ECOPOTENTIAL.

The ECOPOTENTIAL (www.ecopotential-project.eu) project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N641762. VHR images for this exhibition are provided in the framework of the ESA Earthnet TPM Programme, through the ESA EOhopS project managed by CloudEO. Background image ESA/CNET Spot image. For further info please contact: Prof. Dr. Carl Beierkuhnlein, carl.beierkuhnlein@uni-bayreuth.de.
